And 10 million other users

Welcome to the world of Trading Resources

We're glad that you are interested enough to read this pamphlet. It means a lot to us, but even more so for the planet. We have taken the pragmatic view that even if helping the planet is down your priority list, it will be on there somewhere but, quite rightly, below looking after yourself, your business and your family.

Saving money – reducing Co2 - the heart of our business!

It's all too good to be true. We effectively will pay you to save money. Heard it all before? and if it sounds too good to be true it normally is.

BUT, what if it is true.

What if you can save money on your fuel bill and that **SAVING** is **GUARANTEED** to be a minimum of 10% and can, in most cases, be very considerably more.

What if it is true that your **Co2 GHG emissions are cut** by the same percentage as the fuel savings you make without you doing anything else

What if it is true that **carbon credits**, subject to full verification and accountability, can be **sold for more than the combined cost** of the additives you buy through us

What if we provide the accountability and verification package at no direct cost to you.

So how do we do it?

Developed by the US Department of Energy the patented boron mixtures apply an almost frictionless coat to all moving parts it comes in contact with. Energy, and hence fuels, is then not wasted driving the engine components but on delivering improved performance.

Our promise to you - Guaranteed

At Trading Resources we provide you with a complete no quibble guarantee on the quality of all our products. We believe in looking after our customers and help you to get over the "its too good to be true" fallacy. So we provide a guarantee that you will make a minimum of 10% savings subject only to you using the product as per the manufacturer's instructions. If you don't get 10% savings on your fuel bills then you get your money back.

Working harder to help you

Some people will have their own agendas as to why this product is no good. Just question why they have that attitude and are unable to see the wood for the trees. We have all the accreditations, standardisations and ethics necessary, we have guarantees and insured warranties, we do the work on your behalf to get your carbon credits sold, we don't think we can do a lot more, but if you think of something do let us know.

What you can expect from us

Manners cost nothing and personally we would not want to buy from anyone with attitude. Our polite and friendly service is here to help you every step of the way, and are on hand to answer any queries you may have in respect of the products, the procedures, the concepts, or any part of our service to you.

Buying

Buying is easy, why would we make it difficult. You can pay cash, credit card, cleared cheque, draft or barter with your prize goat herd, we really don't mind, so long as you pay at or before the point of delivery.

Delivery

You can expect to have your order despatched within 7 working days from receipt of your order.

We will deliver the goods to the address you specify, and always aim to deliver the goods by the date quoted for delivery, although we cannot always guarantee a specific delivery time. If delivery is delayed due to any cause beyond our reasonable control, we will contact you in good time to arrange an alternative date that is acceptable. Please feel free to contact our customer service office if you wish to check on your order status on 01372 376190 or email admin@tradingresources.co.uk.

Warranty

Vehicle warranties are unaffected by the use of our product and as a matter of practice fleet operators are included in our £5million any one claim insurance.

Technical information

We have a full technical department always ready to answer any question you may have, they can be contacted on tech@tradingresources.co.uk

Sometimes things don't always go right

We are committed to providing very high standards of products and service to every customer, every time, regardless of how you do business with us. We do recognise however, that occasionally things may go wrong or we may not live up to our promises. Your comments, good or bad, are very important. Not only do they allow us to improve our service, but allow us to identify any areas that could benefit from further development. If you feel there is something we can do better, then we want to hear from you.

Accreditations

Rigorous testing over the last 2 years have resulted in:-
ISO (International Standards Organisation) 14064 and 14593
Millbrook Proving Ground, UKAS approved facility, savings proved
HOCNF accredited
ABS PDA certificated

So that's the journey you can expect with us, did it do it for you?
